

ER Coolant systems

With Mechanical Sealed collet.

No need for special nut, or coolant ring for each size
100% mechanical. No rubber seal(pin) used. No ruggar deterioration due to coolant.
Good for Higher Presure 1000psi.

Regular ER collet chuck and ER collet system.

Coolant will leak out from slots of collet and form bell shape.

With Coolant Nut and Coolant Ring

Requires different coolant ring for matching cutter size
Not suited for samller size cutter. It will deflect cutter resulting bad TIR.
We do not offer this system.
